### Scope and Contents

"Theodore De Bry's engraving of John White's manuscript map was the first finely-detailed view of a North American landscape. It depicts English claims to "Virginia," which at the time encompassed both modern Virginia and North Carolina. Created in the wake of the failed English settlement at Roanoke Island, De Bry's color engraving visualizes English understanding of indigenous political communities such as the Secotan, Chawanook, and Weapemeoc peoples. At right, the ships heading into the Chesapeake Bay suggest future pathways for settlement and commerce." -- Mapping the "New World": Highlights from the Paul Schott Stevens Collection

### Scope and Contents

"Produced for the French Navy, the rare chart displayed here was the best available chart of this region for the time, and was used by all naval forces involved in combat during the American Revolutionary War. The information on this very detailed chart was based primarily on the work of American Anthony Smith, a local Chesapeake Bay pilot of St. Mary's County. The chart was consulted by Admiral de Grasse in his victory over the British off the Chesapeake Capes on September 5, 1781."

### Scope and Contents

"Originally published in 1753, the Fry-Jefferson map was the most accurate map of Virginia at that time. This French version was printed at the beginning of the French and Indian War, which began when Governor Robert Dinwiddie ordered George Washington and his Virginia troops to drive the French off British-claimed land. Most of the indigenous names featured in John Smith's map are gone, replaced by Anglo-American settlements." -- Mapping the "New World": Highlights from the Paul Schott Stevens Collection

### Scope and Contents

"Europeans had a more precise understanding of North America and the Caribbean by the early 18th century. Guillaume De L'Isle drew on earlier French expeditions into the continental interior to create the first accurate map of the Mississippi River. His use of color falsely implies fixed borders between competing European and indigenous peoples." -- Mapping the "New World": Highlights from the Paul Schott Stevens Collection

**Material Specification** Scale not determined. Relief shown pictorially. Includes tropic of cancer, equator, and tropic of capricorn lines. Includes illustrations.

**Extent** 1 Sheets1 map ; hand colored38 x 29 cm, on sheet 54 x 38 cm

### Scope and Contents

"Thirty years after Martin Waldseemüller printed one of the first maps of the Americas, Lorenz Fries published an updated European perspective on the New World. "Terra Incognita" on Waldseemüller's map has become "Terra Nova" on Fries's. The Castilian flag marks Spanish territorial claims in the Caribbean, while the continent's indigenous people are caricatured as primitive, reflecting common European misperceptions of native cultures." -- Mapping the "New World": Highlights from the Paul Schott Stevens Collection

**Extent** 1 Sheets1 map ; uncolored36 x 29 cm, on sheet 38 x 32 cm

### Scope and Contents

"From Theodore de Bry's Grand Voyages, Dreyzehender Theil Americae published by Matheus Merian. This German version of Captain John Smith's map of Virginia depicts the English colony shortly after Jamestown's 1607 founding. Powhatan, the principal chief of the indigenous confederacy that dominated the region, presides in the upper left corner. The rivers command our attention. The English expected to settle the interior by following waterways upstream. In time, tobacco plantations worked by indentured servants and slaves replaced the indigenous settlements that dotted these rivers. The Potomac River is visible just above the "SA" in "Chesapeak Bay." -- Mapping the "New World": Highlights from the Paul Schott Stevens Collection
