Contained in wooden and fabric box; peeling label on inside of box: Samuel Freeman, Leadenhall Street, London Makes ye finest Assay & Diamond Scales wth all other Beams, Scales, Weights Still (see below note); Willie Davis loaned to A. Davis July 1829, handwritten on inside of box; set includes: 2-plate apothecary scale; 4 round weights, different sizes; 7 square weights, varying sizes; 1 square thin plate; 1 bent nail. ... (Label note: Three generations were called Samuel Freeman, so only the style can be used to date this label and box. The Coat of Arms was used from 1714 until 1800, the lack of a street number suggests a date before 1765 and the spelling of steelyard as 'stilliard' suggests a date before about 1760. As Samuel Freeman II worked with his son from 1752 until his death in 1757, this suggests a date before 1752.)

Oath of Hippocrates: I swear by Apollo, the physician, by Aesculapius, by Hycei, by Panacea, and by all the gods and goddesses, calling them to witness that according to my ability and judgement I will, in every particular keep this, my oath and covenant: to regard him who teaches this art equally with my parents, to share my substance, and, if he be in need, to relieve his necessities; to regard his offspring equally with my brethren; and to teach his art if they shall wish to learn it, without fee or stipulation; to impart a knowledge by precept, by lecture, and by every other mode of instruction to my sons, to the son of my teacher, and to pupils who are bound by stipulation and oath, according to the law of medicine, but to no other.

I will use that regimen which, according to my ability and judgement, shall be for the welfare of the sick, and I will refrain from that which shall be baneful and injurious. If any shall ask of me a drug to produce death, I will not give it, nor will I suggest such counsel. In like manner I will not give to a woman a destructive pessary.

With purity and holiness will I watch closely my life and my art. I will not cut a person who is suffering from a stone, but will give way to those who are practitioners in this work. Into whatever houses I shall enter, I will go to aid the sick, abstaining from every voluntary act of injustice and corruption, and from lasciviousness with women or men . . free or slaves.

Whatever in the life of men I shall see or hear, in my practice or without my practice, which should not be made public, this will I hold in silence, believing that such things should not be spoken.

While I keep this, my oath, inviolate and unbroken, may it be granted to me to enjoy life and my art, forever honored by all men; but should I by transgression violate it, be mine the reverse.

In grateful recognition, the Student American Medical Association, by the appropriate action of its officers, hereby recognizes the everlasting contribution made to the future of the medical profession by a pioneering band of forty-eight members of the medical student body of The University of Virginia School of Medicine who formed The American Medical Student Association in a small basement room on the nineteenth of May, 1949. From this beginning has grown the Association which now has tens of thousands of members and chapters on most of the medical school campuses of America.

To this small group of students, their first president, J. Allan Offen, and their adviser, Henry B. Mullholland, M.D., the medical students of today and tomorrow owe an eternal debt.

This plaque represents but a tangible token on the part of past, present, and future members of The Student American Medical Association for the heritage left them by these former medical students at the University of Virginia School of Medicine.

John Belt, President, Student American Medical Association. Presented on May 5, 1956.

Hippocratic Oath- title in Greek, text in English: I swear by Apollo the physician and Aesculapius and health, and All-heal and all the gods & goddesses, that, according to my Ability and Judgement, I will keep this Oath and this Situplation - to reckon him how taught me this Art equally dear to me as my Parents, to share my Substance with him, and to relieve his necessities if required; to look upon his offspring in the same footing as my own brothers, and to teach them this Art, if they shall wish to learn it, without fee or stipulation; & that by Precept, Lecture and every other Mode of Instruction, I will impart a Knowledge of the Art to my own sons, and those of my Teachers, and to Disciples bound by a Stipulation and Oath according to the Law of Medicince, but to none others.

I will follow that System of Regimen which, according to my ability and judgment, I consider for the Benefit of my Patients, and abstain from whatever is deleterious and mischievous. I will give no deadly medicine to any one if asked, nor suggest any such counsel; and in like manner, I will not give to a woman a pessary to produce abortion. With Purity and Holiness I will pass my life and practice my Art.

I will not cut persons laboring under the stone, but I will leave this to be done by men who are practitioners of this work. Into whatever houses I enter, I will go into them for the Benefit of the sick, and will abstain from every voluntary act of mischief and corruption; and further, from the seduction of females or males, of freemen and slaves.

Whatever, in connection with my professional practice, or not in connection with it, I see or hear, in the life of men, which ought not to be spoken abroad, I will not divulge as reckoning that all such should be kept secret. While I continue to keep this Oath unviolated, may it be granted to me to enjoy Life and the practice of the Art, respected by all men in all times! But should I trespass and violate this Oath, may the reverse be my lot.
