Series Statement

This collection is divided into four series: Professional papers, Correspondence, Dr. Bernice Speese papers, and Maps. These are further divided into subseries. Professional papers contains general papers, United States Department of Agriculture papers, reports, Liberia records, Hevea research, Great Dismal Swamp records, plant families, and cytogeography records. Correspondence is divided into general, correspondence to specific individuals, and student correspondence. Dr. Bernice Speese is divided into correspondence and professional papers.

Administrative Information

Conditions Governing Access

Collection is open to all researchers. Manuscript collections and archival records may contain materials with sensitive or confidential information that is protected under federal or state right to privacy laws and regulations, such as the Virginia Public Records Act (Code of Virginia, § 42.1-76-91); and the Virginia Freedom of Information Act (Code of Virginia § 2.2-3705.5). Confidential material may include, but is not limited to, educational, medical, and personnel records. If sensitive material is found in this collection, please contact a staff member immediately. The disclosure of personally identifiable information pertaining to a living individual may have legal consequences for which the College of William and Mary assumes no responsibility.

Conditions Governing Use

Before publishing quotations or excerpts from any materials, permission must be obtained from the Curator of Manuscripts and Rare Books, and the holder of the copyright, if not Swem Library.

Preferred Citation

John Thomas Baldwin Jr. papers, Special Collections Research Center, William & Mary Libraries.

Biographical / Historical

Dr. John Thomas Baldwin Jr. (1910-1974) received his undergraduate degree from William & Mary, and a Ph.D. from the University of Virginia. He joined the William & Mary faculty in 1937, before leaving in 1939 to teach at the University of Michigan for two years. Dr. Baldwin returned to William & Mary in 1944, where he rose from assistant professor of botany to chairman of the biology department over the course of his career.

Dr. Baldwin specialized in cytogenetics, the study of plant chromosomes, and boxwoods. His work also focused on *Strophanthus sarmentosus*, a plant from the same genus as the dogbane family. When he traveled to Liberia in 1947 at the behest of the United States Department of Agriculture (USDA) for a survey of the distribution, prevalence and behavior of *Strophanthus*, it was discovered to be a natural source of cortisone. The plant was used extensively in the early manufacturing of the drug.

Dr. Baldwin traveled to four continents in the course of his studies, and working with his colleague Dr. Bernice Speese, he used the seeds and plantings from those trips to turn the campus of William & Mary into a natural laboratory. Some of the plants that remain today are among the oldest cultivated representatives of their species in the United States.

Dr. Baldwin passed away on September 3, 1974 at the age of 63.

Content Description

This collection contains materials pertaining to the professional career and personal life of Dr. John Thomas Baldwin Jr. Also included are the professional papers of Dr. Bernice Speese, a William & Mary professor and colleague of Dr. Baldwin.

Materials include articles, drawings, maps, personal and academic correspondence, media clippings and written research notes, report drafts, photography, and government documents related to Baldwin's work with the United States Department of Agriculture (USDA).

Separated Materials

Several books were received along with the papers. Some volumes were retained and catalogued, the others were returned to the William & Mary Herbarium.

Description of Subordinate Components

Professional papers

Unit ID /repositories/2/archival_objects/609275

Unit Date 1911-1983

Scope and Contents

Papers pertaining to Dr. Baldwin's work both within and outside of William & Mary. This series is divided into eight subseries: General papers, United States Department of Agriculture (USDA), Reports, Liberia, Hevea research, The Great Dismal Swamp, Plant families, and Cytogeography.

General papers

Unit ID /repositories/2/archival_objects/609276

Unit Date 1924-1983

Scope and Contents

Papers, notes, articles, and other documents acquired or created by Baldwin in the course of his work. Two particular sections of note in this series are The Blandy Experimental Farm at University of Virginia and the Kingsville Nurseries, now Foxborough Nursery, Inc. These were two organizations he worked closely with to acquire and research new plant specimens.

Unit ID /repositories/2/archival_objects/609767

Unit Date 1919-1981

Biographical / Historical

Dr. Bernice Marguerite Speese (1911-1985) was a professor and botanist who worked at William & Mary. She co-authored papers with Dr. Baldwin on the topics of mitosis, chromosomes, and cytogeography among others. The two worked closely together throughout their careers. She was one of the leaders in boxwood research, and served on the cabinet of the American Boxwood Society for several years.

Dr. Speese was born in 1911, and died in 1985.

Scope and Contents

Papers created by and pertaining to Dr. Bernice Speese that were transferred as part of the Dr. Baldwin papers. This series is divided into two subseries: correspondence, and professional papers.

Correspondence

Unit ID /repositories/2/archival_objects/609769

Unit Date 1939-1981

Scope and Contents

Correspondence to and from Dr. Speese. Arranged alphabetically by last name.

Maps primarily focused on regions of Brazil. Two of the maps were created and distributed by the Office of Crop Acclimatization, Bureau of Plant Industry, in Washington D.C. Seven others are from a series produced by the American Geographical Society of New York. The Dismal Swamp map was drafted by the US Army Corps of Engineers.
