Scope and Contents

Topographic maps by the U.S. Geological Survey of various cities and towns in West Virginia. These are quadrangle maps covering four-sided areas bound by parallels of latitude and meridians of longitude. Contour lines show land shapes and elevation; colors distinguish map features, such as roads, rural areas, woodlands, urban areas, landmark buildings, etc. Due to the collection's diversity in age, information recorded on the maps may vary.

The maps' sizes are given in minutes of 7.5, 15, 20, 30, or 60. The minutes represent the scale and area, with the higher numbers corresponding to a larger area of square mileage. For example, a 7.5 minute series map represents a scale of 1:24,000, while a 15 minute series represents 1:62,500.

Boxes 1-3 include 15 minute quadrangles and larger, and boxes 4-9 include 7.5 minute quadrangles. The two oversize items are 1 degree sheets.
